

Ayobami FawazAnifowoshe, Software Engineer

London, United Kingdom, anifowosefawaz17@gmail.com

PROFILE

Passionate and driven Junior Software Developer with a strong foundation in game design, software development, and real-time rendering using Unreal Engine. Skilled in C++, Blueprints, and level design, with a keen eye for visual storytelling and game-play mechanics. Successfully contributed to a collaborative cartoon project launched on Netflix, achieving over 3 million views and generating over \$100k in revenue. A fast learner and proactive team player, committed to delivering immersive gaming experiences through innovation, technical precision, and continuous improvement.

EMPLOYMENT HISTORY

Mar 2024 — Apr 2026	Junior Gameplay Programmer, PLANET 7 Studios	United Kingdom
•Designed and developed core gameplay systems for a platformer game using Unreal Engine and C++, including player movement, combat mechanics, enemy behaviours, and interactive elements. •Implemented foundational AI behaviour using state machines and later transitioned to Unreal's Behaviour Tree system for scalable and modular AI logic. •Integrated the Gameplay Ability System (GAS) to support extensible player abilities and combat interactions, focusing on clean architecture and maintainability. •Collaborated closely with animators and designers to bring characters to life through Sequencer and animation blueprint integration. •Utilised Blueprints for rapid prototyping and iteration while maintaining performance-critical features in native C++.		
Oct 2022 — Feb 2024	GamePlay Programmer, Khromium Studios	Derby
•Developed and maintained core gameplay systems for 2D and 3D game projects using Unreal Engine and C++, with a strong emphasis on object-oriented programming principles and reusable architecture. •Built interactive UI tools and editor extensions using React for internal use, enhancing game design workflows and debugging capabilities. •Assisted in integrating cross-platform features by leveraging Java for backend interactions and utility scripting (e.g., for Android or server-side components). •Collaborated with cross-functional teams including designers, artists, and backend developers to implement and refine features that enhanced player experience. •Contributed to game systems such as player mechanics, input handling, combat logic, and animation syncing. Participated in sprint planning, code reviews, and debugging sessions, and consistently delivered clean, maintainable code in fast-paced development cycles.		

EDUCATION

Sep 2023— Jun 2025	BTEC Level 3 National Diploma in Computer Science, City Of Wolverhampton College	Wolverhampton
Completed coursework in programming, software development, and computer systems, with a strong focus on practical, real-world application. Earned a Distinction for consistently high performance across all units.		

COURSES

Mar 2024 — Oct 2024	Epic Games Game Design, Epic Games
Apr 2023 — Nov 2023	C++ For Game Development , Udemy

SKILLS

C++, C#, Java, React	Expert	Git, Github, Perforce, Diversion	Expert
Unreal Engine, Unity	Expert	Visual Studio, Visual Studio Code	Expert
Team Work	Expert	Creativity	Expert
Communication	Expert	Time management, Adaptability	Expert
